# Income Statements and Balance Sheet 

By Sarah Azhar

## Purpose of Income Statements

Knowing what profits are made helps businesses to do many things, including:

- Planning ahead.
- Obtaining loans from banks, from other businesses, or from private individuals.
- Telling prospective business partners how successful the business is.
- Telling someone who may be interested in buying business how successful the business is.
- Calculating the tax due on the profits so that the correct amount of tax can be paid to the tax authorities.

## Purpose of Income Statements

- In case of a trader (someone who is mainly concerned with buying and selling goods), the profits are calculated by drawing up an income statement.
- Income Statement: The financial statement in which the calculations of gross profit and then net profit are presented.
- It contains trading account, which is prepared in order to arrive at the figure for gross profit.
- Trading account: An account in which gross profit is calculated that is part of an income statement.
- Gross profit: Where sales revenue exceeds the cost of goods sold.

## Purpose of Income Statements

- Below the trading account is shown a summary of another accountthe profit and loss account. The profit and loss account are prepared as to arrive at the figure of net profit .
- Profit and loss account: An account in which net profit is calculated that is summarized and included in a separate edition of the income statement.
- Net profit: Where sales revenue plus other income, such as rent received, exceeds the sum of cost of goods sold plus other expenses.
- Both the trading account and the profit and loss are part of the double entry system. At the end of financial period, they are closed off.

## Gross Profit

Gross profit is calculated as follows:

```
Sales-Cost of goods sold=Gross Profit
```

```
What we bought in the period:
```

Purchases

Less goods bough but not sold in the period: (closing inventory)
Cost of goods sold
Q) If Sales are $\$ 38500$, purchases are $\$ 29000$ and closing inventory is $\$ 3000$, what is the gross profit?

## Trading account

| Dr | Sales |  | Cr |
| :---: | :---: | :---: | :---: |
| 2008 | \$ | 2008 | \$ |
| Dec 31 Trading | $\underline{38500}$ | Dec 31 Balance | $\underline{38500}$ |
| Dr | Purchases |  | Cr |
| 2008 | \$ | 2008 | \$ |
| Dec 31 Balance | $\underline{\underline{29000}}$ | Dec 31 Trading | $\underline{\underline{29000}}$ |

## Trading account

| 2008 | \$ | 2008 | \$ |
| Dec 31 Balance | $\underline{\underline{7000}}$ | Dec 31 Capital | $\underline{\underline{7000}}$ |

## B Swift

Income Statement for the year ending 31 December 2008

|  | \$ | \$ |
| :---: | :---: | :---: |
| Sales |  | 38500 |
| Less cost of goods sold |  |  |
| Purchases | 29000 |  |
| less closing inventory | (3000) |  |
|  |  | (26000) |
| Gross Profit |  | $\underline{12500}$ |
| Less Expenses |  |  |
| Rent | 2400 |  |
| Lighting expenses | 1500 |  |
| General expenses | 600 |  |
|  |  | (4500) |
| Net Profit |  | $\underline{8000}$ |

## Statement of Financial Position

- Balance Sheet: s statement showing assets, liabilities and capital of a business.
- In drawing up a balance sheet, we do not enter anything in the various accounts. We do not transfer any balance, to the balance sheet. Nothing is entered in the ledger accounts.
- All we do is list the assets, capital and liabilities balances as to form a balance sheet.
- When the next accounting period starts, these accounts are still open and they all contain balances. As a result of future transactions, entries are then made in these accounts that add to deduct from these opening balances using double entry.

## Statement of Financial Position Layout

- Assets: We are going to show assets under two headings, non-current assets and current assets.

1-Non-current assets will are listed first in balance sheet starting with those the business will keep the longest, down to those which will not be kept so long.

```
Non-current Assets
```

1- Land and buildings
2-Fixtures and Fittings
3-Machinery
4-Motor Vehicles

## Statement of Financial Position Layout

- Assets: We are going to show assets under two headings, non-current assets and current assets.

2-Current assets are listed in increasing order of liquidity-that is staring with the asset furthest away form being turned into cash, and finishing with the cash itself.

## Current Assets

1-Inventory
2-Accounts receivable
3-Cash at bank
4-Cash in hand

## Statement of Financial Position Layout

## Liabilities

- Current liabilities: Examples include bank overdrafts, account payables.
- Non-current liabilities: Examples include bank loans, loans from other businesses.
